Professional Summary

Software Quality Assurance Engineer with 4+ years of experience ensuring product quality across SaaS, AI-driven, and Financial Technology (FinTech) platforms. Experience includes working with WalletHub, a leading U.S.-based personal finance company, as part of a globally distributed, English-speaking product team. Specialized in functional, regression, and REST API testing across web and mobile applications, with a strong focus on release stability, data accuracy, and validating complex financial workflows.

Work Experience

Manual QA Engineer Jan 2026 – Sep 2026
WalletHub (A Product of Evolution Finance, Inc.)

- Execute functional, regression, smoke, and exploratory testing across cross-platform web and mobile applications.
- Validate complex financial workflows, calculations, and data-driven features to ensure accuracy and reliability.
- Test transaction-related flows and backend-integrated functionalities under boundary and edge-case scenarios.
- Perform REST API validation using Postman, verifying authentication, response behavior, and data integrity.
- Validate financial workflows and third-party integrations ensuring data accuracy and reliability.
- Test subscription and billing workflows integrated with Stripe, validating account upgrades, cancellations, and billing scenarios.
- Investigate application errors and backend exceptions using monitoring tools to support debugging.
- Support release cycles through end-to-end validation, regression coverage, and risk-based testing.
- Validate releases in Blue-Green deployments through smoke and regression testing before rollout.
- Verify notifications, email communications, and user-facing content for consistency and correctness.
- Identify, document, and manage defects in Jira while collaborating with cross-functional teams.

Software Quality Assurance Engineer Apr 2024 – Jan 2026
Associate Software QA Engineer Apr 2022 – Mar 2024
SQA Intern Dec 2021 – Mar 2022
Codemen Solutions Ltd. (Affiliated with PremiseHQ SaaS Inc.)

- Designed and executed test plans and test cases for SaaS & AI-powered applications.
- Performed functional, regression, smoke, and exploratory testing to validate features and workflows.
- Led API testing and debugging using Postman, ensuring authentication, authorization, and data integrity.
- Conducted performance testing with JMeter to evaluate scalability and response behavior.
- Collaborated with developers and product managers to triage, prioritize, and resolve defects.
- Delivered client-facing demos, contributed QA insights for product improvements, and mentored junior QA engineers on test design and UAT practices.

Education

BSc in Computer Science & Engineering
American International University-Bangladesh
2017 – 2021
CGPA: 3.16/4.00

Core Skills

- Functional, Regression, Smoke, Exploratory Testing
- API Testing (Postman), REST API Validation
- Performance Testing (JMeter)
- Defect Tracking & Test Management (Jira, TestRail, Qase)
- Cross-Browser & Compatibility Testing
- Agile / Scrum
- SQL / MySQL Queries

Technical Tools

- Jira, TestRail, Qase
- Postman, JMeter
- BrowserStack
- MySQL, Amazon Redshift
- Stripe (test environment), Sentry.io

Professional Achievements

- Contributed to QA of the SAIL AI platform, winner of the **Realcomm Digie Award 2023** (Best Tech Innovation).

Engagements

- Hosted CUET-ETE x Codemen QA orientation
- Conducted QA knowledge-sharing sessions

Areas of Interest

- Test Automation Frameworks
- System Design Fundamentals
- Cloud QA (AWS, Azure)
- Testing AI-driven Applications

Languages

Bengali: Native
English: Professional proficiency (Daily use in international work environment)
